TOPIC 05 · HANDS-ON LAB · 60 MINUTES

Lab 5 — Run the Lead-to-Cash Cycle: Lead, Opportunity, Quote, Order

Explore Dynamics 365 Sales

Objective

Explore Dynamics 365 Sales: lead qualification, opportunity management, quotes, orders and invoices, and business process flows.

Scenario

Suzanne Burke of Contoso - Washington has enquired about new espresso equipment. You take that enquiry through the entire sales lifecycle: capture the lead, work the Lead to Opportunity business process flow, qualify it into an opportunity, add products from the catalog, generate a quote, activate and win it, convert to an order and raise the invoice. This is the LO1/LO3 backbone of the course.

What you'll produce

DELIVERABLE

A qualified lead, an opportunity with product line items and estimated revenue, an activated and won quote, a sales order and an invoice — with the business process flow advanced to Close.

Tools: Dynamics 365 Sales Hub, Dataverse, business process flows, product catalog, quotes, orders, invoices

Workflow

1	2	3	4	5
Create the lead and complete the Qualify stage	Log activities and qualify into an opportunity	Add catalog products and estimated revenue	Create, activate and win the quote	Convert to an order and generate the invoice

Mock data supplied

The files below are in the **data/** folder beside this PDF. Import them as each step directs — do not retype the values.

data/leads.csv — 4 rows

Topic	First Name	Last Name	Job Title	Business Phone	Email	Company Name	City	Est. Budget (SGD)	Purchase Timeframe
Looking for New Equipment	Suzanne	Burke	CFO	888 555-8715	suzanne@contososample.com	Contoso - Washington	Seattle	25000	This Quarter
Cold brew dispensers for 4 outlets	Daniel	Lim	Operations Director	+65 6555 0191	daniel.lim@jurongcafe.example.sg	Jurong Cafe Group	Singapore	48000	Next Quarter
Airport kiosk grinder refresh	Ravi	Kumar	Regional Manager	+65 6555 0178	ravi.kumar@changikiosks.example.sg	Changi Airport Kiosks	Singapore	72000	This Quarter
Hotel lobby coffee programme	Kevin	Teo	F&B Director	+65 6555 0155	kevin.teo@orchardhotels.example.sg	Orchard Hotels	Singapore	95000	This Year

data/products.csv — 5 rows

Product ID	Name	Unit Group	Default Unit	List Price (SGD)	Description
P-100	Contoso Espresso Machine E900	Default Unit	Primary Unit	8500.00	Dual-boiler commercial espresso machine

Product ID	Name	Unit Group	Default Unit	List Price (SGD)	Description
P-101	Contoso Burr Grinder G200	Default Unit	Primary Unit	2200.00	Commercial on-demand burr grinder
P-102	Cold Brew Dispenser CB50	Default Unit	Primary Unit	3400.00	50-litre nitro-ready cold brew dispenser
P-103	Annual Service Plan	Default Unit	Primary Unit	1200.00	12-month preventive maintenance and priority support
P-104	Barista Training Package	Default Unit	Primary Unit	950.00	Two-day on-site barista training for up to 6 staff

Step-by-step

1. Open the Dynamics 365 Sales Hub. Under Sales in the left navigation select Leads, then choose the My Open Leads view and select New on the command bar.
2. Create the lead from row 1 of data/leads.csv: Topic 'Looking for New Equipment - <your initials>', First Name 'Suzanne', Last Name 'Burke', Job Title 'CFO', Business Phone '888 555-8715', Email 'suzanne@contososample.com', Company Name 'Contoso - Washington'. Select Save and leave the record open.
3. Note the Lead to Opportunity Sales Process business process flow across the top of the form. Select the Qualify stage to open its flyout and complete it: Purchase Timeframe 'This Quarter', Estimated Budget '25000', Purchase Process 'Individual', Identify Decision Maker 'Completed'.
4. Scroll to the Timeline in the middle of the form. Select the + icon and choose Phone Call. Set the Subject to 'Initial phone call - <your initials>' and leave the other fields as they are. Select Save and Close.
5. On the Timeline, hover over the phone call activity and select the check-mark icon to close it, then select Close on the dialog. The activity now shows as Closed — a completed qualification touch.
6. On the command bar select Qualify. Dynamics 365 creates the related Account, Contact and Opportunity records and advances the business process flow to the Develop stage. If prompted about creating records, accept the defaults.
7. You are now on the new Opportunity. Confirm the Contact is Suzanne Burke and the Account is Contoso - Washington. Set the Est. Close Date to the end of next month and the Purchase Timeframe to This Quarter. Save.
8. Add products. On the opportunity, open the Product Line Items sub-grid (Products tab) and select + New Opportunity Product. Choose Existing Product, pick a product from the catalog, set Quantity to 2, and Save and Close. Add a second line item the same way.
9. If your environment has no product catalog entries, create them first: Settings > Advanced Settings > Product Catalog > Products, and add the two items from data/products.csv with the Default Price List. Publish each product before it can be added to an opportunity.
10. Note that the opportunity's Est. Revenue is now calculated from the line items (System Calculated). Switch it to User Provided and enter 25000 if you want to override it — record which method your organisation would use and why.
11. Complete the Develop stage of the business process flow: set Identify Stakeholders and Identify Competitors to Completed. Open the Related tab and add one Stakeholder (Suzanne Burke, role Decision Maker) and one Competitor.
12. Advance to the Propose stage. On the command bar select Create Quote (or, from the Quotes sub-grid, + New Quote). The quote inherits the account, contact, price list and product line items from the opportunity.
13. On the quote, set the Name to 'Espresso equipment quote - <your initials>', confirm the line items carried across, and check the totals: Detail Amount, Discount, Pre-Freight Amount, Freight Amount and Total Amount. Save.
14. Select Activate Quote on the command bar. The quote becomes read-only — this is the version you would send to the customer. Note that you must Revise the quote to change it, which creates a new revision.
15. Select Create Order (or Close Quote as Won). On the Create Order dialog, tick Close Opportunity and set the status. This converts the quote into a Sales Order and marks the opportunity Won.
16. On the new Order, confirm the line items and Total Amount carried across. Set the Requested Delivery Date to two weeks from today. Save. Note the Order is the customer's commitment to buy.

17 Select Create Invoice on the order command bar. On the Invoice, confirm the line items and total. Note the Due Date field. Save.

18 Mark the invoice as paid: on the command bar select Invoice Paid, and choose Complete (paid in full) rather than Partial. Record the difference between the two options in your worksheet.

19 Return to the Opportunity and confirm the business process flow has reached Close and the opportunity status is Won with the actual revenue recorded. Take a screenshot of the full record chain as evidence.

Test it

VERIFY BEFORE YOU MOVE ON

You can trace one unbroken chain: Lead (Qualified) -> Opportunity (Won) -> Quote (Won) -> Order -> Invoice (Paid), with the same two product line items and totals carried through, and the Lead to Opportunity business process flow advanced to the Close stage.
